DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4,11,22-33,35-41 and 43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carduck et al in view of Davidson et al or EP 0 830 927 A2.

Carduck et al discloses extruding a viscous composition through an orifice plate and reducing the extrudate to cylindrical pellets by means of a rotating chopping blade. See column 3, line 50 through column 4, line 24. Using a liquid jet to cut the extrudate of Carduck et al would have been obvious to one of ordinary skill in the art because Davidson et al and the European reference show that liquid jets are alternative means of cutting extrudate into granules. The size and pressure of the jets and size of the holes in the plate would have been obvious based on the desired size of the granules and the force necessary to cut the material being processed.

Allowable Subject Matter

2. Claims 5-10,12-21,34 and 42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1732

3. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not suggest rotating the liquid jet(s) or the ligaments.
